PROJECTS

Crime Radar

GitHub Repository: <https://github.com/mitchelljohnson3/project-1.git>

Deployed Project: <https://mitchelljohnson3.github.io/project1/>

- A collaboration project building an app that takes the user's location and populates a map and table with recent crimes that have occurred in the area.
- Used the Google API and SpotCrime API to create and populate the map and table.
- My main contribution was creating and populating the map, as well as the page design.

Work Day Planner

GitHub Repository: <https://github.com/jayballa7/ballard-day-planner>

Deployed Project: <https://jayballa7.github.io/ballard-day-planner/>

- A dynamically generated, color-coded app that helps the user to keep track of meetings and events during their work day.
- Utilized Bootstrap for responsive design and jQuery to dynamically create the page.

OOP Template Engine

GitHub Repository: <https://github.com/jayballa7/Ballard-OOP-Template-Engine.git>

- A command-line application that takes user input and creates a webpage displaying info of employees on a software developing team.
- Built primarily with Node.js and JavaScript using inquirer and path packages.
